

INSTRUCTIONS STAGE 4

What is a webinar?

A webinar is a lecture or similar presentation or form of knowledge transfer that takes place via the internet.

How to join our webinars?

If you bought stage 4, you will be emailed personally (within 3 working days due to the time difference). We ask you to make a choice here from the webinars that are currently scheduled. If you have communicated your choice to us, you will receive a personal link to the webinar so that you can attend it live. Afterwards you will also receive a download link, so that you can watch the webinar again.

Bought the package deal?

If you bought our package deal, the webinar is free and you have probably already received an email asking which webinar you would like to attend. When we have received a response, you will receive a personal link by email.

Which platform do we use?

Which platform we use depends on the number of people who want to attend the webinar. When it concerns a small number (maximum 10 people), we will start a private zoom session. If it concerns a large number of people, we use the platform webinar.k. All information for logging in follows in a personal email.

How to prepare for a webinar?

You do not have to prepare for a webinar, but it is useful to already think about a few questions about the subject, so that you can ask our teacher questions during or after the webinar.

Duration of the webinar

Our webinars last approximately 45 to 60 minutes.
